Description of Experience in Real Estate

During the last 13 years my efforts have been focused almost entirely in the real estate area. I had hands on experience working construction two summers – first working directing for a contractor constructing a single family residence from plans to completion, and then working with a partner remodeling an old house which we ultimately sold. My sons and I formed a company (LGD Ventures) in which we acquired two small residences in Boise, Idaho, we partially remodeled them and ultimately sold them. We also acquired and built several commercial retail centers in Boise and Middleton. My oldest son manages the properties and I handle the legal work.
